

Reordering

1. Create a web app to reorder a shuffled java program. Each cell may have one line of a Java program and should be moveable. provide a faculty route to upload a set of java program in a pdf. When user comes to students page show the shuffled java program one by one. When the user clicks submit, check with correct java program given by faculty and display score
2. Nice. Make the following changes. No need to shuffle all lines. Get the range of lines that has to be shuffled from the faculty and only shuffle those lines. On student side display unshuffled correct lines as text and for shuffled lines also provide moveable components. Give some different colors for fixed and moveable components
3. trying to publish in netlify I get page not found error
4. I uploaded the code1.pdf file. It is recognizing as a single program. I have got three codes given as Q1, Q2, Q3. what changes should I make
5. I can make the changes in pdf. let me know how should I number?

Audio App

1. Create a web app to display a question, get the answer from the user as voice convert to text and print
2. Still not working. How to run the server?
3. The webpage stops even if there is a delay in speech. whether that can be changed?
4. Make it as a simple question answering web app for Java. Ask some simple questions let the student gives the answer over voice. Check the correctness of answer and grade out of 3.

5. use this gemini API key

XXXXXXXXXXXXXXXXXXXXXXXXXXXX

6. There was no option to clear the text box when I made mistake. Can you provide that option so that if a student makes a mistake while speaking he can clear and start again or partially delete text

7. how voice is converted to text? It is not that good

8. Is there any free version available for speech to text otherwise change to en-IN. It was giving as mission when I said as machine

9. out of Google Cloud STT, Azure Speech, AssemblyAI which one is best?

10. how to get API key for Google Cloud STT

11. Enable start recording and clear the spoken words when the user click next question

12. let start Speaking be pressed in the beginning and when user navigate to next question

13. Can you make a separate html page to reach as faculty like when we hit localhost:8080/faculty. Provide an option to add questions and answers in a PDF. Display the questions one by one. For evaluation, send the question, answer given by faculty to the LLM

14. Failed to parse PDF: PDF parser is not loaded.

15. In faculty page it was giving options to add question to quiz. The text saved successfully was next getting cleared after moving to next Question. Also all 5 questions were asked on student side. Is it working as expected?

16. this text Saved successfully. Open the student page and refresh to load these questions.

17. not changing on faculty page when next button is clicked

18. Still it asks all 5 questions on student side

19. Add Current Question and Save Selected For Quiz are confusing, have only Save Selected For Quiz
